

# AVISO website: what's in it for you?

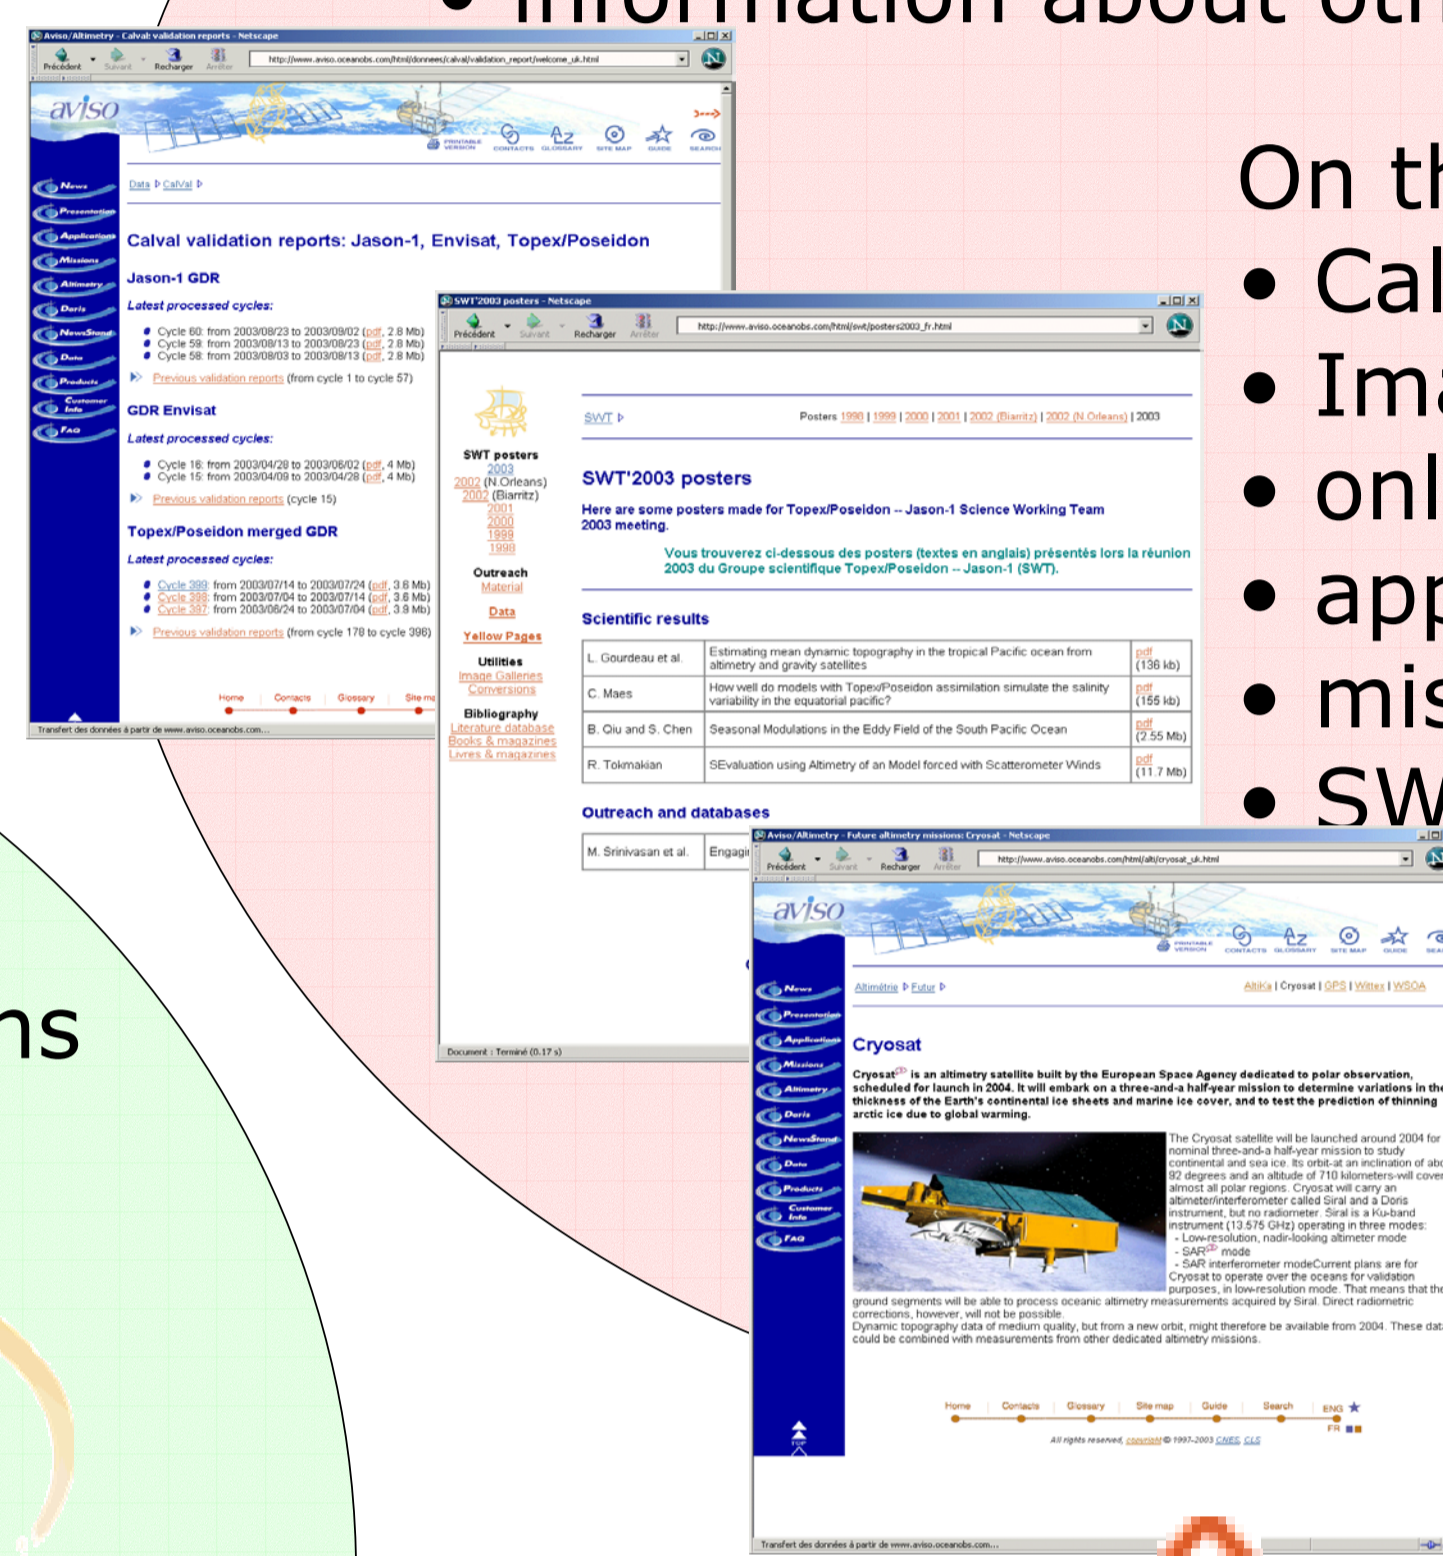

For more than eight years now, Aviso website has evolved with the data, their users, science, and the world in general, with the constant concern to answer as well as possible the needs of its public. Do you need to be kept informed about the altimetry missions (and even ocean-observing missions in general), to demonstrate your work or other people's, to retrieve and use data and to know about their quality? Aviso website gives you answers: updated **Missions** and **Altimetry** pages, oceanography on-the-spot **News**, **Applications** and **Image of the Month**, as well as an archive of past SWT posters, online Newsletter, complete view of available data, validation reports and handbooks...

## PIs

- Need:
- information about the mission(s)
  - demonstration of their work
  - information about other people's work

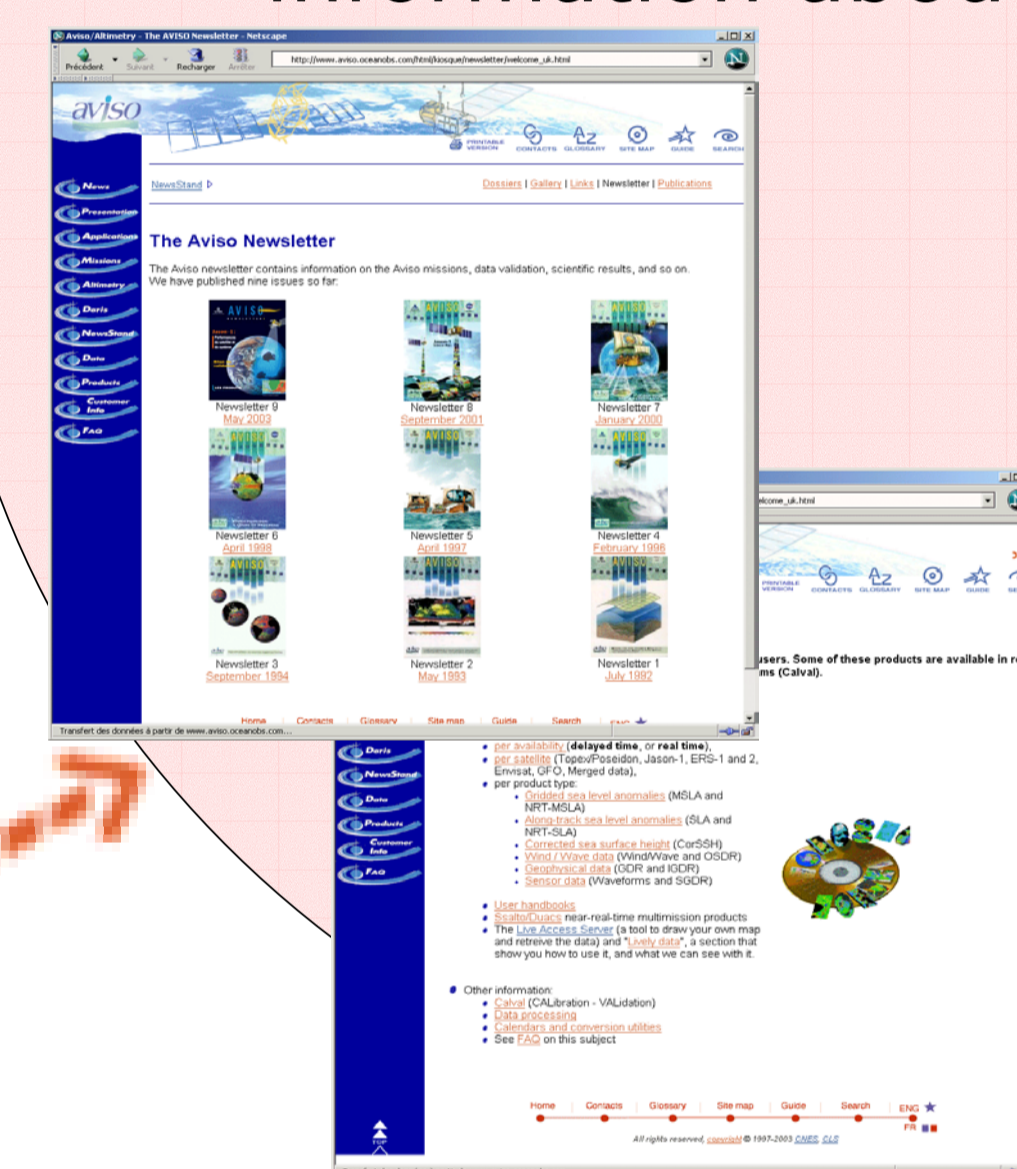

- On the web:
- Calval reports
  - Image of the Month
  - online Newsletter
  - applications
  - mission status
  - SWT posters

## Altimetry users

- Need:
- data, products, online handbooks
  - demonstration of their work
  - information about other people's work
  - information about data quality

- On the web:
- Image of the Month
  - online Newsletter
  - scientific bibliography
  - catalogue
  - applications
  - validation reports

## Children

- Need:
- easy-to-understand explanations
  - gadgets, fun things
  - games

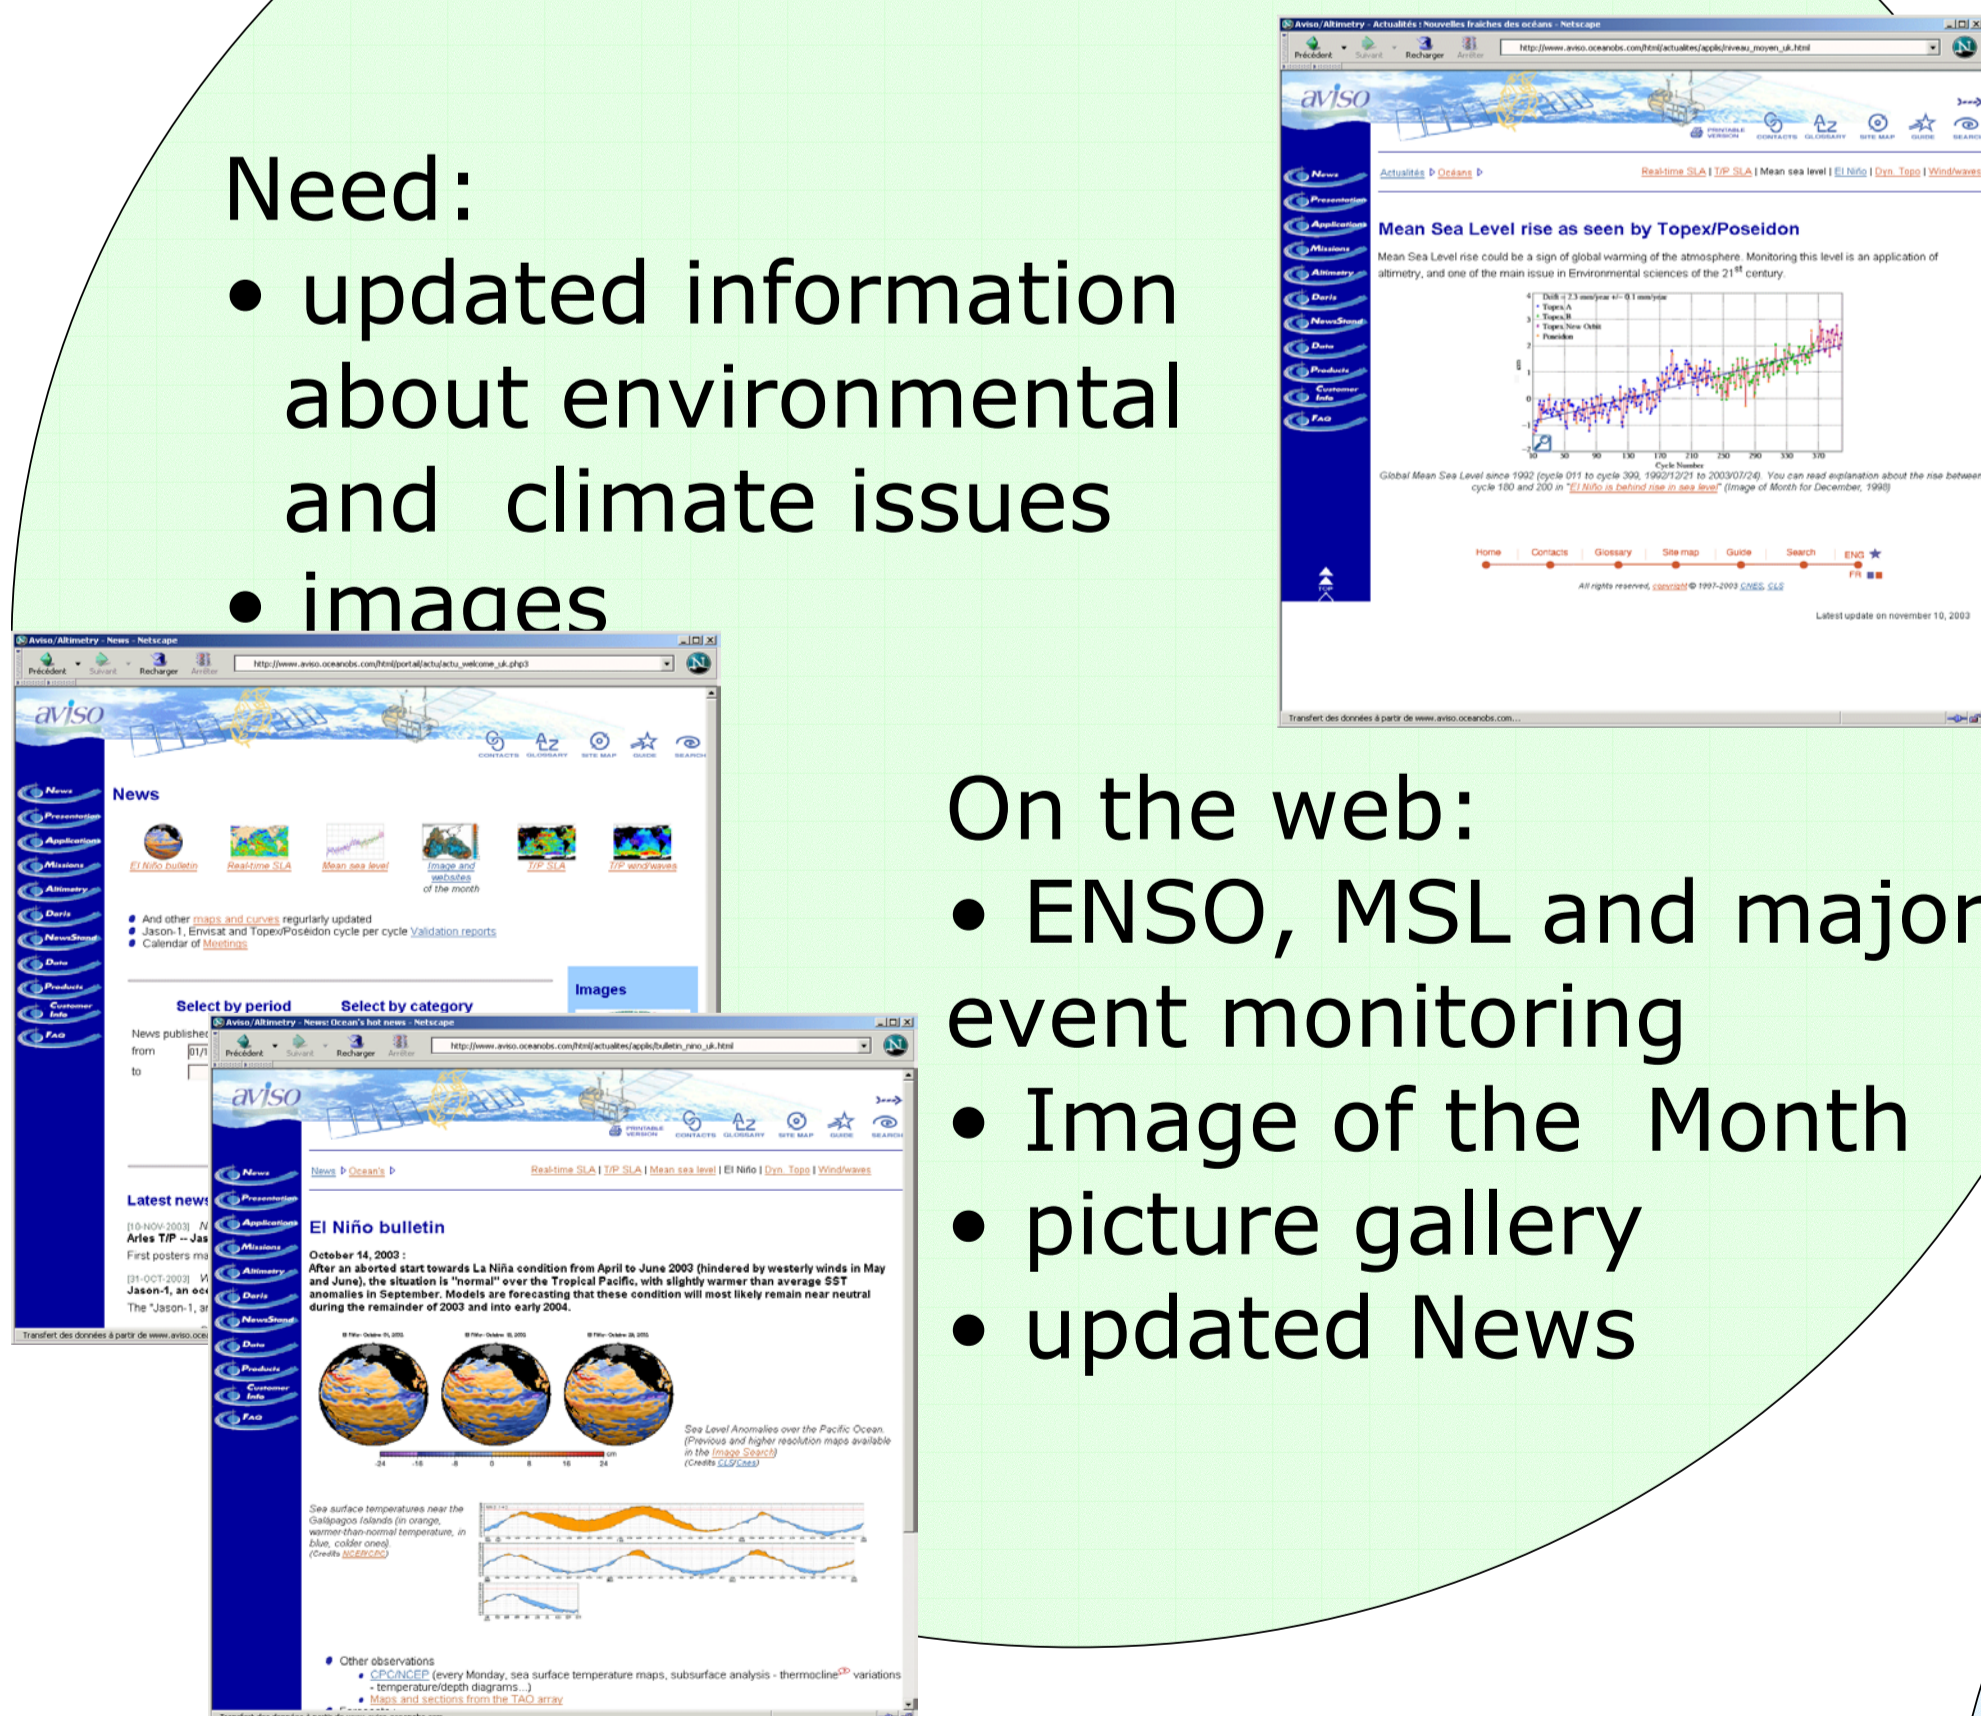

- On the web:
- educational website
  - picture gallery
  - board game

## Media & General Public

- Need:
- updated information about environmental and climate issues
  - images

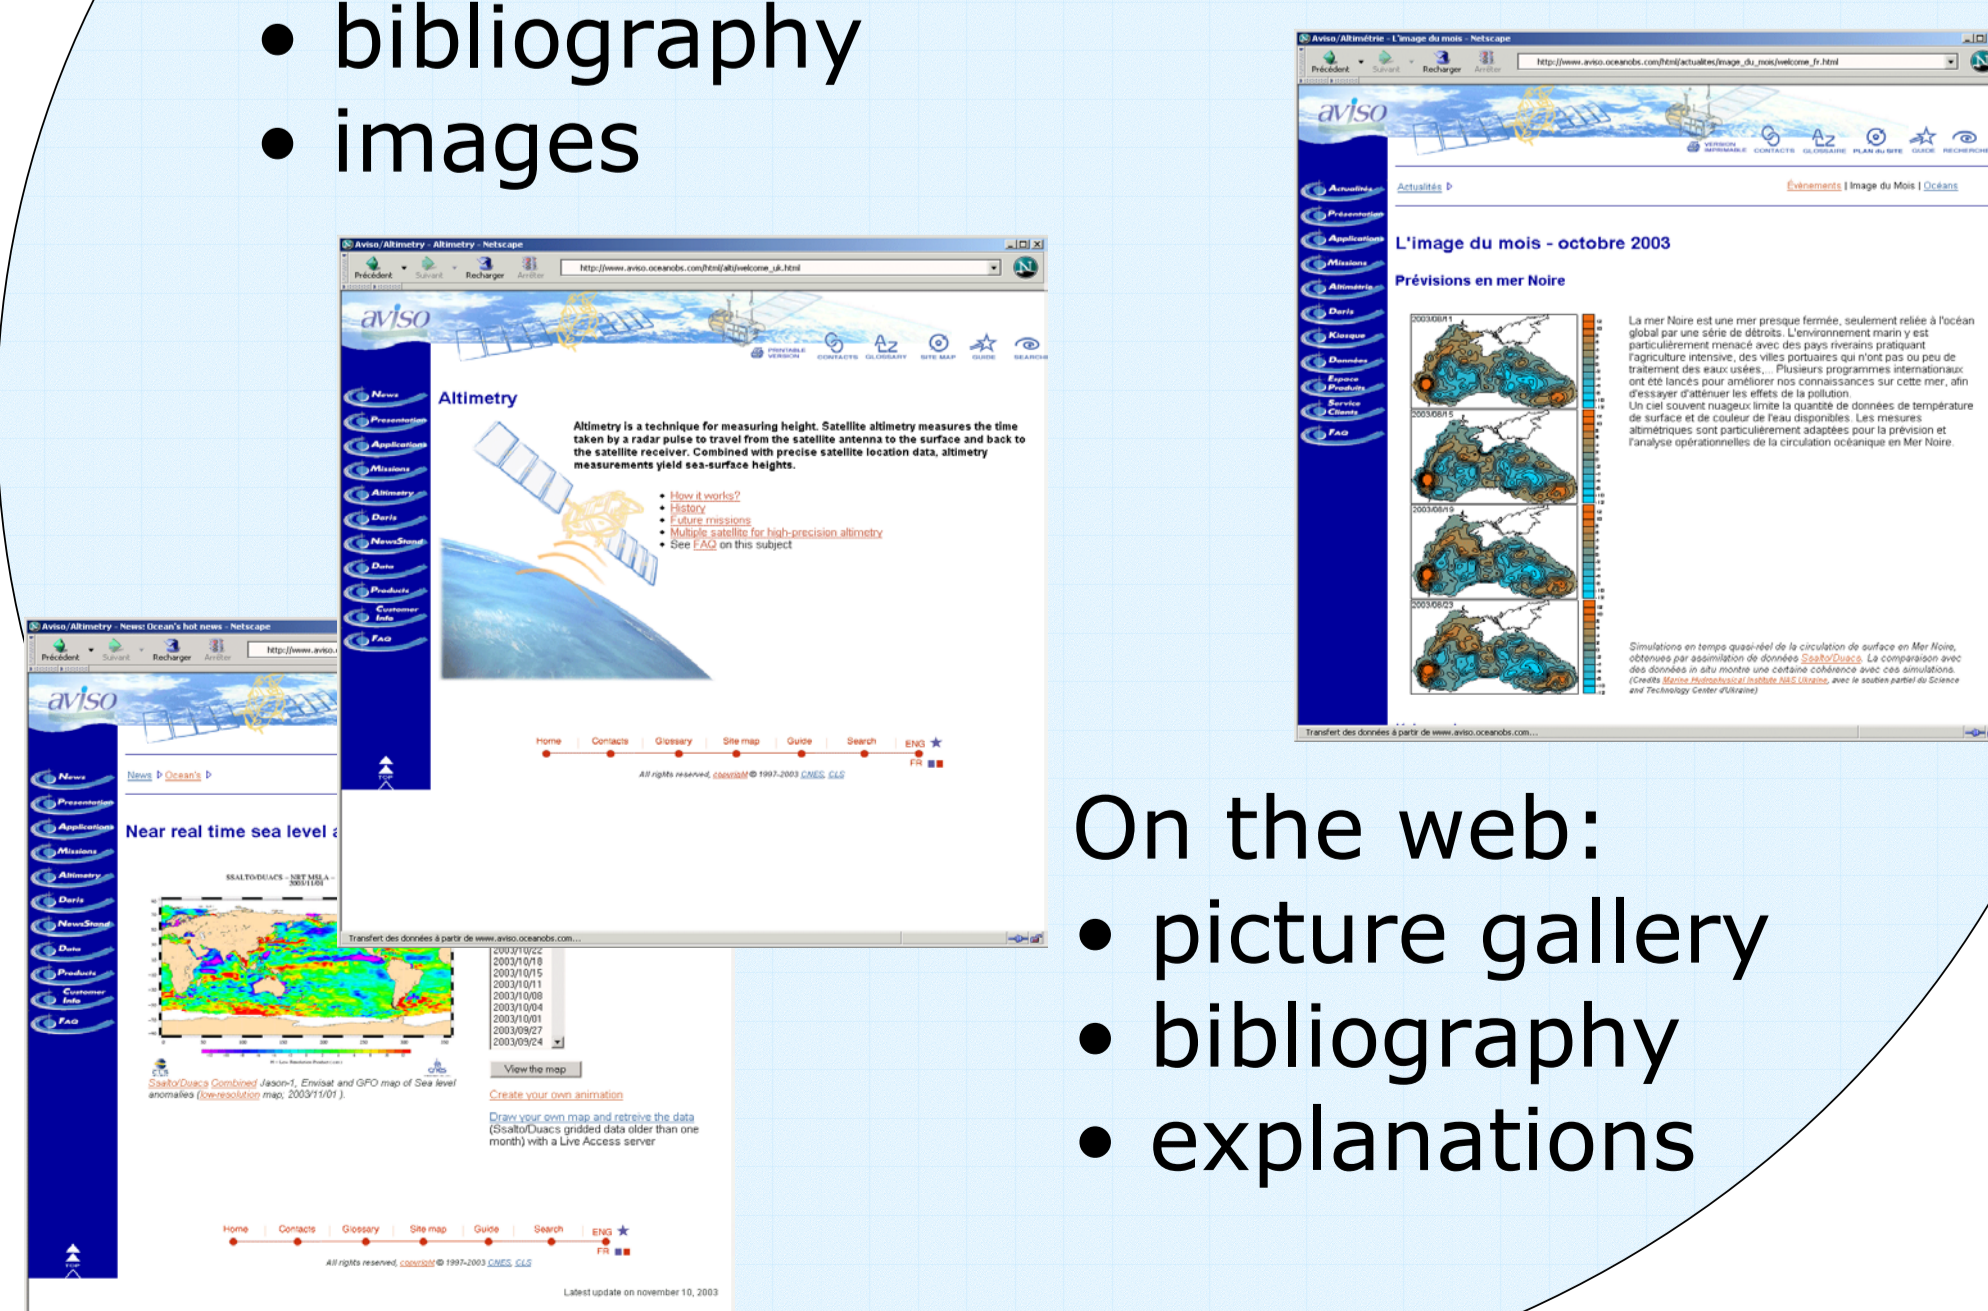

- On the web:
- ENSO, MSL and major event monitoring
  - Image of the Month
  - picture gallery
  - updated News

## Students & Teachers

- Need:
- material for courses and projects
  - bibliography
  - images

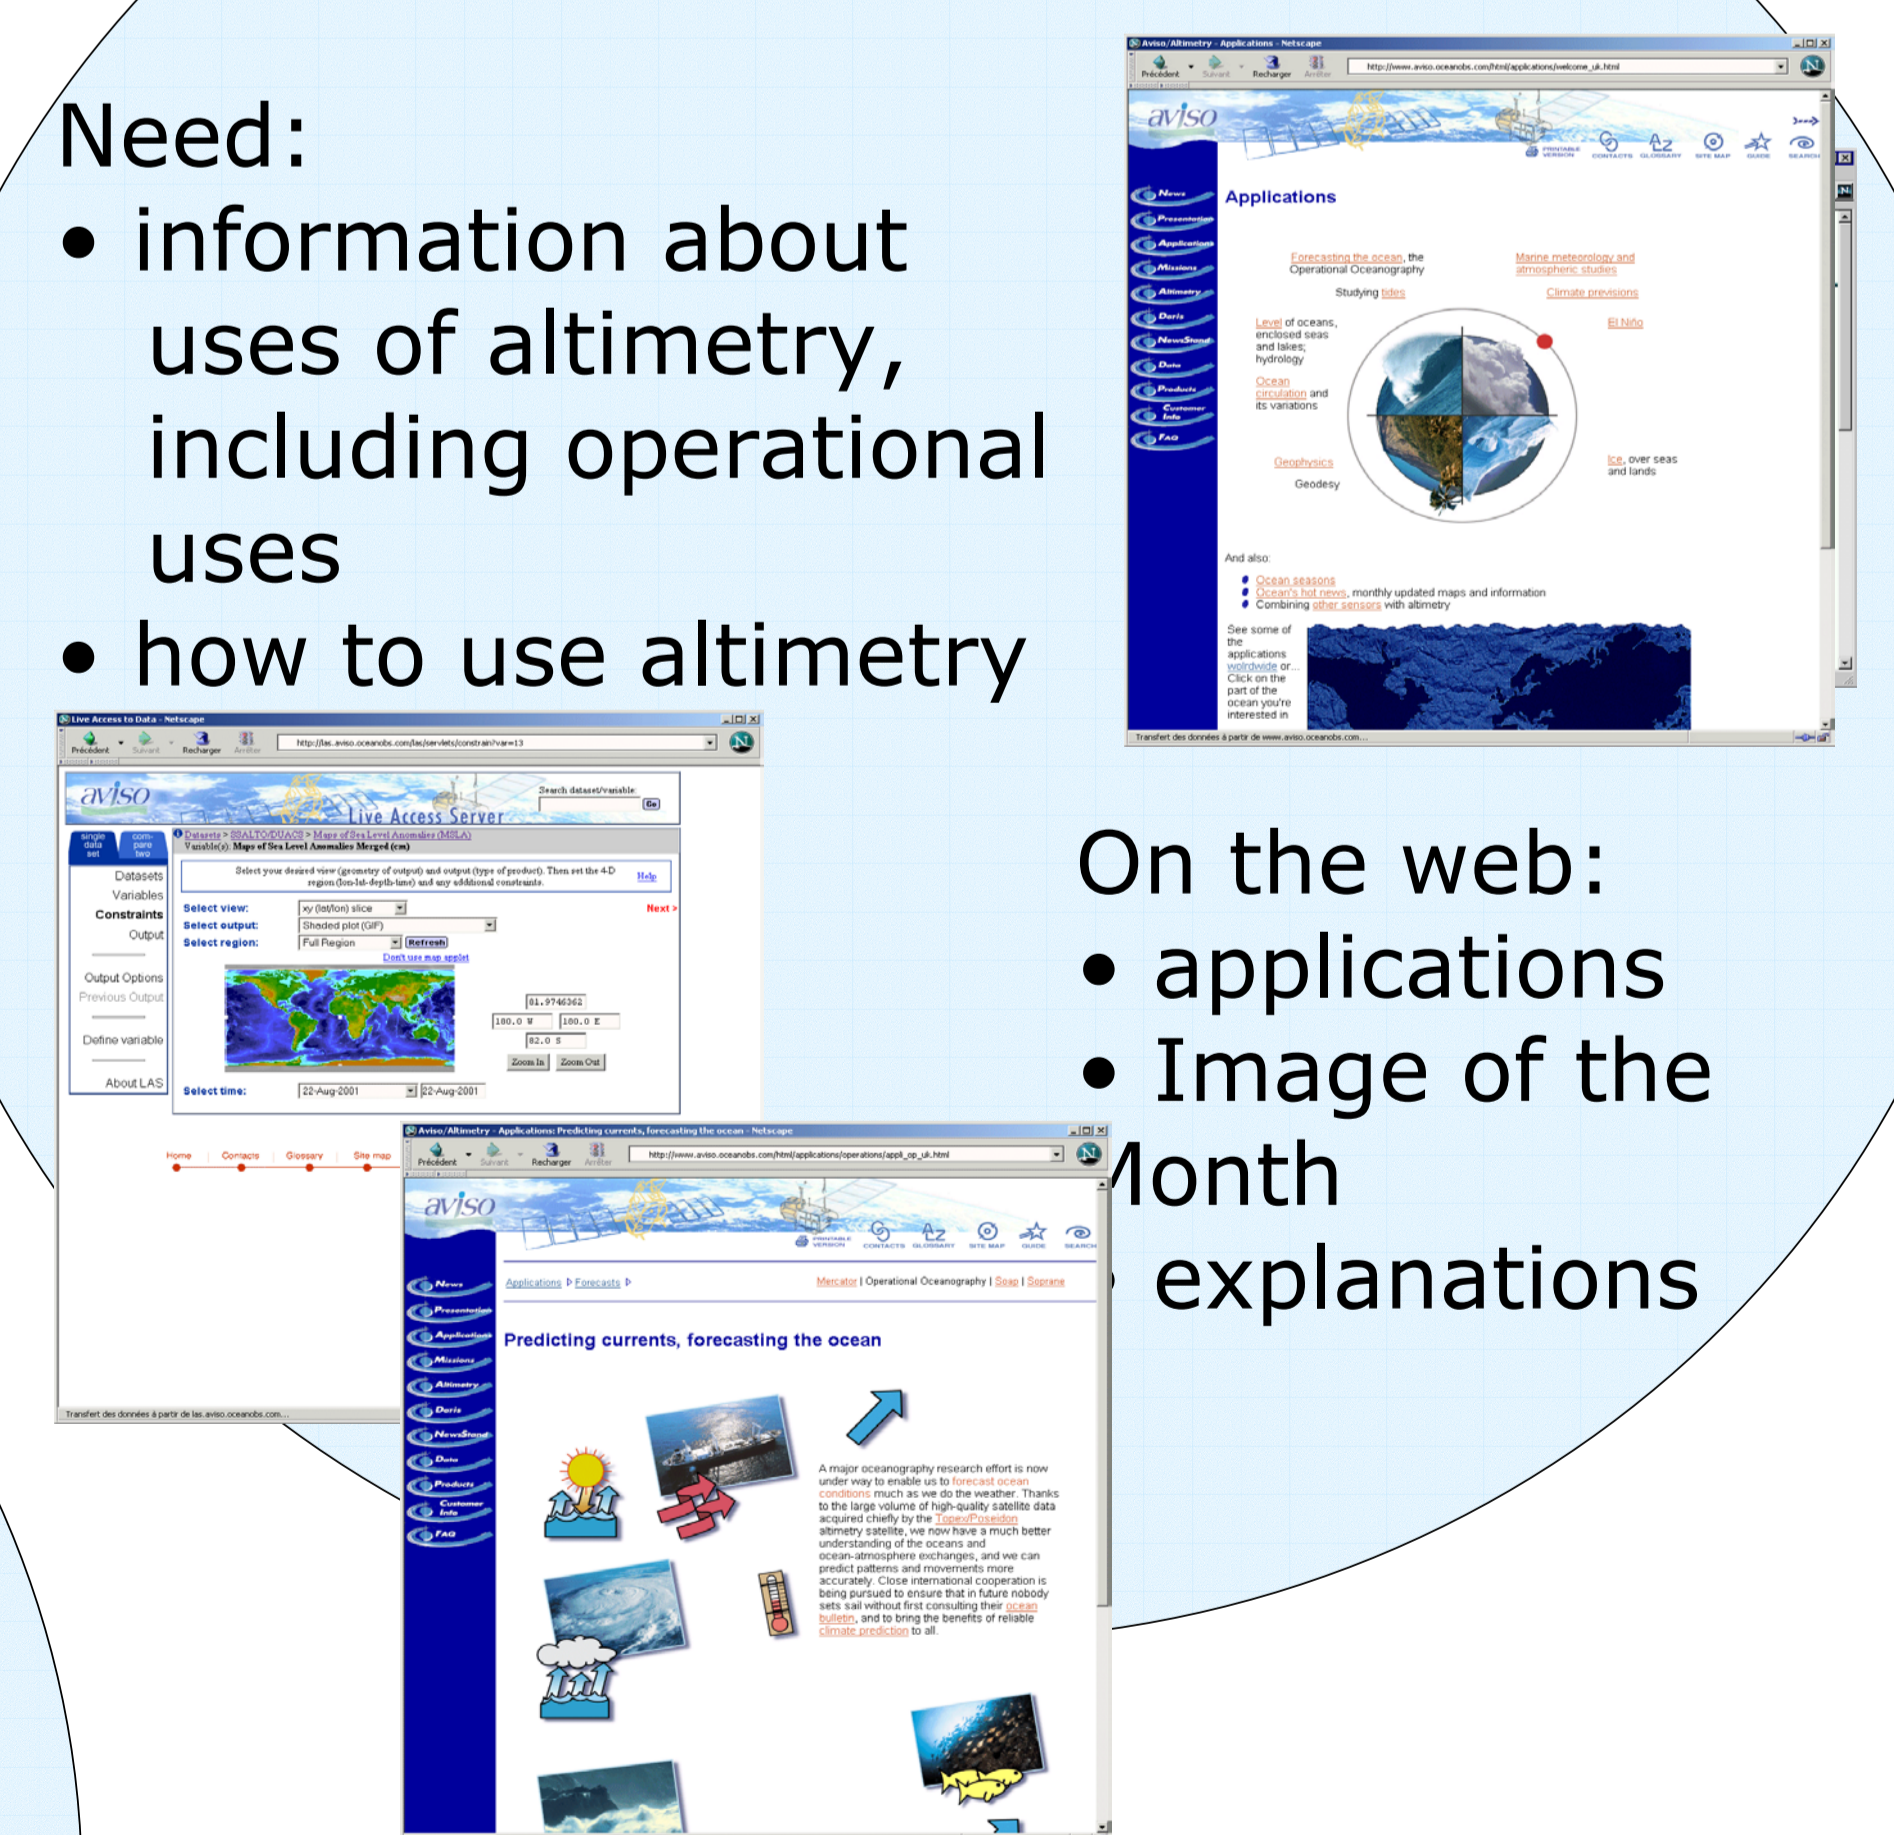

- On the web:
- picture gallery
  - bibliography
  - explanations

## Marine Science Users

- Need:
- information about uses of altimetry, including operational uses
  - how to use altimetry

- On the web:
- applications
  - Image of the Month explanations
